DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/22/09 has been entered.

Response to Amendment

The amendment filed 9/22/09 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the system depicted in new figure 9 and the description of that system. (See the rejection under 35 U.S.C. 112, 1st paragraph set forth below for further details.)

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 21-35 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 21 recites, "A phase estimation system, the system comprising a biological system" and "a computing device". The specification, as originally filed fails to describe a phase estimation system, a computing device, or the phase estimation system comprising the biological system and the computing device. Claim 21 further recites "wherein the estimated phase is displayed". The originally filed specification further fails to describe displaying the phase, as claimed.

Response to Arguments

Applicant's arguments filed 9/22/09 have been fully considered but they are not persuasive.

Applicants point to paragraphs 4, 5, and 18 of US 20060122781 for support for the claimed phase estimation system comprising a biological system and a computing device. While paragraph 4 mentions "computing power" there is no indication that a computing device is part of the "phase estimation system". Paragraph 18 points to figure 1 as a biological system that produces a periodic bio-signal. However, Paragraph 10 describes the figure as a "flow chart" not a system and the figure depicts a series of functions rather than an apparatus or concrete device. The flow chart/ model of figure 1

cannot be relied upon for support of the "biological system" as claimed since abstract functions alone cannot constitute a patentable apparatus or system. The applicants' further reliance upon new figure 9 and the new description of that figure is also unpersuasive because the new figure and specification are considered new matter which must be cancelled (see "Response to Amendment" set forth above).
